Inventory for FOIA Request 1999-0118-F

Records on Health Care Reform

Extent

1,325 folders

Access

Collection is open to all researchers. Access to Bush Presidential Records and Quayle Vice Presidential Records is governed by the Freedom of Information Act (FOIA)(5 USC 552 as amended) and the Presidential Records Act (PRA)(44 USC 22) and therefore records may be restricted in whole or in part in accordance with legal exemptions.

Copyright

Documents in this collection that were prepared by officials of the United States government as part of their official duties are in the public domain. Researchers are advised to consult the copyright law of the United States (Title 17, USC) which governs the making of photocopies or other reproductions of copyrighted material.

Provenance

Official records of George Bush's presidency and vice presidency are housed at the George Bush Presidential Library and administered by the National Archives and Records Administration (NARA) under the provisions of the Presidential Records Act (PRA).

Processed By

Staff Archivists, March–September 1999. Previously restricted materials are added as they are released.

Scope and Content

The materials in FOIA 1999-0118-F are a selective, not necessarily all inclusive, body of documents responsive to the topic of the FOIA. Researchers should consult the archivist about related materials.

FOIA 1999-0118-F contains information on health care reform. The materials are divided into two major sections which are Bush Presidential Subject Files and the Bush Presidential Staff and Office Files. In addition, there is a small variety of Quayle Vice Presidential Staff and Office Files captured in this request that also reflect many various health care reform matters.

White House Office of Records Management (WHORM) Subject Categories contain memoranda, letters, reports, newspaper clippings, press releases, and fact sheets concerning international health care comparisons with the United States; Native American health care; federal, state, and local health care initiatives; and veteran's health care.

The Staff and Office Files contain: reports; memoranda; talking points; press releases; fact sheets; speeches and speech drafts; remarks by administration officials; newspaper clippings on Bush administration health care reform proposals; reaction to health care proposals; veterans health care; endorsements of various health care plans; Medicaid reform/cost containment; Medicare waiver applications which include the controversial Oregon proposal; materials from the Health Policy Working Group; materials from the Healthcare Equity Action League (HEAL); Clinton/Bush health care comparisons; House and Senate health care proposals; and news summaries of health care proposals.

Johannes Kuttner's Staff and Office Files provide a very detailed examination of the development of the Bush health care plan and the development of criticisms to rival health care plans. In addition to these files are printouts of Kuttner backup diskettes that contain information about a variety of issues related to health care reform. The diskettes are listed according to disk number and directory followed by a brief description of the files in that particular directory. If no description follows the directory listing, the files were unreadable or they are of such a general nature, no brief description was possible.

System of Arrangement

Records that are responsive to this FOIA request were found in three collection areas—Bush Presidential Records: WHORM Subject Files; Bush Presidential Records: Staff and Office Files; and Quayle Vice Presidential Records: Staff and Office Files. As policy, WHORM Alphabetical Files and WHORM Subject Files are processed at the document level; whereas, Staff and Office Files are processed at the folder level, that is, individual documents are not selected and removed from a folder for processing. While this method maintains folder integrity, it frequently results in the incidental processing of documents that are not wholly responsive to the subject area.

The WHORM Subject File compiled by the White House Office of Records Management is comprised of a series of documents assigned a letter/number combination and filed in a subject category. A complete listing of the subject categories including a detailed description of each category is available in our research room and on our website at <http://bushlibrary.tamu.edu/research/find/whorm/whorm.html>.

Please note that a single asterisk "*" indicates that the category is entirely processed and open.

The following is a list of documents and folders processed in response to FOIA 1999-0118-F.
