Inventory for FOIA Request 2011-1613-F[1]

Records on Oil, Gas, and Energy Policy

Extent

968 folders

Access

Collection is open to all researchers. Access to Bush Presidential Records, Bush Vice Presidential Records, and Quayle Vice Presidential Records is governed by the Freedom of Information Act (FOIA)(5 USC 552 as amended) and the Presidential Records Act (PRA)(44 USC 22) and therefore records may be restricted in whole or in part in accordance with legal exemptions.

Copyright

Documents in this collection that were prepared by officials of the United States government as part of their official duties are in the public domain. Researchers are advised to consult the copyright law of the United States (Title 17, USC) which governs the making of photocopies or other reproductions of copyrighted material.

Provenance

Official records of George Bush's presidency and vice presidency are housed at the George Bush Presidential Library and administered by the National Archives and Records Administration (NARA) under the provisions of the Presidential Records Act (PRA).

Processed By

Staff Archivists, November 2013. Previously restricted materials are added as they are released.

System of Arrangement

Records that are responsive to this FOIA request were found in four collection areas—Bush Presidential Records: WHORM Alphabetical Files; Bush Presidential Records: WHORM Subject Files; Bush Presidential Records: Staff and Office Files; and Quayle Vice Presidential Records: Staff and Office Files. As policy, WHORM Alphabetical Files and WHORM Subject Files are processed at the document level. Staff and Office Files are processed at the folder level, that is, individual documents are not selected and removed from a folder for processing. While this method maintains folder integrity, it frequently results in the incidental processing of documents that are not wholly responsive to the subject area.

The WHORM Subject File compiled by the White House Office of Records Management is comprised of a series of documents assigned a letter/number combination and filed in a subject category. A complete listing of the subject categories including a detailed description of each category is available in our research room and on our website at <http://bushlibrary.tamu.edu/research/find/whorm/whorm.html>.

Please note that a single asterisk "*" indicates that the category is entirely processed and open.

Scope and Content

The materials in FOIA 2011-1613-F[1] are a selective, not necessarily all inclusive, body of documents responsive to the topic of the FOIA. Researchers should consult the archivist about related materials.

FOIA 2011-1613-F[1] contains records related to the Bush Administration's national oil, gas, and energy policy. The document formats consist of government forms, letters, memos, papers, lists, reports, charts, talking points, statements, press briefings, news releases, published materials, and publications.

The Bush Presidential White House Office of Records Management (WHORM) Files contain correspondence to President Bush from administrative officials, senators, and private citizens. Topics include energy policy, conservation, offshore drilling, and renewable resource alternatives. Also present are papers, statements, radio public service announcements, newspaper clippings, and a Federal Register entry on energy strategy and conversation policy.

The Bush Presidential Staff and Office Files contain various government forms which log and route correspondence to the White House. Correspondence between President Bush, administration officials, congressmen, and energy and natural resource leaders addresses the National Energy Strategy (NES) and other energy policy issues. Correspondence from private citizens discusses issues such as oil and gas resources development, oil pipeline deregulation, and proposed legislation feedback. Of particular note is a letter Department of Energy (DOE) Secretary Admiral James Watkins sent to all state governors regarding a contingency plan developed in anticipation of oil supply shortfalls in the event of Persian Gulf hostilities.

Papers, charts and reports describe development of the, federal energy management, alternative fuels, regulatory reform initiatives, and energy conservation measures. Also included are transcripts of testimonies by administration officials before various congressional subcommittees. Lists outline pending energy-related legislation, the administration's accomplishments related to its oil and gas agenda, deregulatory initiatives, and executive branch actions proposed by the NES. Statements include remarks by President Bush at meetings with energy and natural resources industry representatives, official statements on administration policy support for the NES, and remarks to a joint session of Congress on domestic energy production and conservation. Printed material consists of government and private publications related to the NES, and newspaper articles on the administration's energy strategy, alternative energy sources, oil prices, and global warming.

The Quayle Vice Presidential Staff and Office Files contain essentially the same types of documents covering the same topics. One noteworthy communication is an unclassified cable describing the International Energy Agency's approval of a contingency plan for hostilities in the Middle East. Other items of interest are magazine articles about Zapata Oil and newspaper articles about Latin America's oil industry. Lastly, a publication on the construction of the Alaska natural gas transportation system rounds out the vice presidential records.

The following is a list of documents and folders processed in response to FOIA 2011-1613-F[1].
