Inventory for FOIA Request 2013-0843-F

Selected records on National Security Telecommunications and Information Policy

Extent

930 folders

Access

Collection is open to all researchers. Access to Bush Presidential Records, Bush Vice Presidential Records, and Quayle Vice Presidential Records is governed by the Freedom of Information Act (FOIA)(5 USC 552 as amended) and the Presidential Records Act (PRA)(44 USC 22) and therefore records may be restricted in whole or in part in accordance with legal exemptions.

Copyright

Documents in this collection that were prepared by officials of the United States government as part of their official duties are in the public domain. Researchers are advised to consult the copyright law of the United States (Title 17, USC) which governs the making of photocopies or other reproductions of copyrighted material.

Provenance

Official records of George Bush's presidency and vice presidency are housed at the George Bush Presidential Library and administered by the National Archives and Records Administration (NARA) under the provisions of the Presidential Records Act (PRA).

Processed By

Staff Archivists, December 2013. Previously restricted materials are added as they are released.

System of Arrangement

Records that are responsive to this FOIA request were found in seven collection areas—Bush Presidential Records: WHORM Alphabetical Files; Bush Presidential Records: WHORM Subject Files; Bush Presidential Records: Staff and Office Files; Bush Vice Presidential Records: Subject Files; Bush Vice Presidential Records: Staff and Office Files; Quayle Vice Presidential Records: Staff and Office Files; and Federal Records. As policy, WHORM Alphabetical Files and WHORM Subject Files are processed at the document

level. Staff and Office Files are processed at the folder level, that is, individual documents are not selected and removed from a folder for processing. While this method maintains folder integrity, it frequently results in the incidental processing of documents that are not wholly responsive to the subject area.

The WHORM Subject File compiled by the White House Office of Records Management is comprised of a series of documents assigned a letter/number combination and filed in a subject category. A complete listing of the subject categories including a detailed description of each category is available in our research room and on our website at <http://bushlibrary.tamu.edu/research/find/whorm/whorm.html>.

Please note that a single asterisk "*" indicates that the category is entirely processed and open.

Scope and Content

The materials in FOIA 2013-0843-F are a selective, not necessarily all inclusive, body of documents responsive to the topic of the FOIA. Researchers should consult the archivist about related materials.

FOIA 2013-0843-F contains materials from agencies, individuals, business associations and committees including, but not limited to, the Office of Science and Technology, National Telecommunications Information Administration, National Communications System, Economic Policy Council, National Advisory Committee on Semiconductors, Telecommunications Industry Association and the National Security Telecommunications Advisory Committee. The materials also include documents from the Working Groups on Telecommunications, Cable Television, Joint Industry-Government Telecommunications Industry Mobilization and Privacy in Telecommunications as well as legislative referrals to/from Health & Human Services, Departments of Commerce, State, Justice, Labor, etc.

The White House Office of Records Management (WHORM) Alphabetical Files contain letters from the general public concerning telecommunications issues.

The WHORM Subject File categories contain correspondence, memoranda, news clippings, journal articles and brochures from the general public, Congress, scholars, business leaders and Bush administration officials concerning telecommunications programs and policy, infrastructure, security, competitiveness, export controls, emerging technologies, equipment and legislation.

The Bush Presidential Staff and Office Files contain correspondence, memoranda, Congressional testimony, reports, press releases, scholarly studies, publications, proposed legislation, Presidential statements and remarks maintained by individual staff members and offices; information concerning the membership and meetings of the National Security Telecommunications Advisory Committee, foreign travel and annual reports produced for the President; materials regarding the Emerging Telecommunication Act, Cable TV Consumer Protection and Competition Act, Cable Television Act, Computer Matching and Privacy Protection Act; reports from the Communications and Satellite Corporation, Government Accounting Office (Tax Policy and Administration) and the International Conference on Global Interdependence on Science, Medicine and Technology; studies of Economic Analysis and Policy Implications of the Financial Interest and Syndication Rule, viability of telecommuting accompanied by state reports from California, Washington and Illinois; and the inventory, assignment, location of White House computers with associated training and procedural manuals for their use.

The Bush Vice Presidential Staff and Office Files contain briefing books, procedure manuals, reports, memoranda on computers, telecommunications and regulations from administration officials and business leaders. Also included are materials from the National Narcotics Border Interdiction System as well as the Task Forces on Border Control and Regulatory Relief.

The following is a list of documents and folders processed in response to FOIA 2013-0843-F.
