#### Processed By

Staff Archivists, 1996–1997. Previously restricted materials are added as they are released.

#### Scope and Content

The materials in FE007 (National Emergency) are a systematically processed body of documents from the White House Office of Records Management (WHORM) Subject File. This secondary subject category contains materials relating to the conditions necessary for a national emergency to be declared by the President. There is only a single folder found here, with one letter from a New Jersey congressman urging Bush to declare a state of emergency in order to facilitate the release of additional unemployment benefits. In the remaining document the Senate Foreign Relations Committee tells the President that since the cause for declaring a national emergency in the case of Iraq still exists, there is no reason to introduce a resolution terminating the crisis footing under which the U.S. currently operates.

**System of Arrangement**

Records that are responsive to this FOIA request were found in Bush Presidential Records: WHORM Subject Files.

The WHORM Subject File compiled by the White House Office of Records Management is comprised of a series of documents assigned a letter/number combination and filed in a subject category. A complete listing of the subject categories including a detailed description of each category is available in our research room and on our website at <http://bushlibrary.tamu.edu/research/find/whorm/whorm.html>.
