#### Scope and Content

The materials in RA (Real Property) are a systematically processed body of documents from the White House Office of Records Management (WHORM) Subject File. This primary subject category contains materials relating to the views of several departments concerning H.R. 3161, the Federal Property and Administrative Services Authorization Act of 1991. It also includes testimony dealing with the Federal Facility Compliance Act of 1991 (the issue of federal agencies complying with environmental standards), reports and other papers of S. 3123 (amending the Federal Property and Administrative Services Act with respect to bid protest procedures), and the attempt of the Bush administration to get HUD to set forth definitive rules and regulations regarding RESPA (Real Estate Settlement Procedures Act). In somewhat

lesser detail, several environmentally-related topics are considered and examined. They include Kennecott's voluntary cleanup of its Utah copper property, after scoring high on the Hazard Ranking System, without the site being placed on the National Priorities List; a request that the Bush administration intervene to halt the construction of a toxic waste landfill and incinerator complex in Augusta Township, Michigan; and a plea for President Bush to give recycling a chance for success by supporting a moratorium on incinerators until the year 2000.

### **System of Arrangement**

Records that are responsive to this FOIA request were found in Bush Presidential Records: WHORM Subject Files.
