Inventory for Systematic Review

Records on WHORM Subject File SP (Speeches)

Extent

89.2 linear feet; boxes 1-223

Access

Collection is open to all researchers. Access to Bush Presidential Records is governed by the Freedom of Information Act (FOIA)(5 USC 552 as amended) and the Presidential Records Act (PRA)(44 USC 22) and therefore records may be restricted in whole or in part in accordance with legal exemptions.

Copyright

Documents in this collection that were prepared by officials of the United States government as part of their official duties are in the public domain. Researchers are advised to consult the copyright law of the United States (Title 17, USC) which governs the making of photocopies or other reproductions of copyrighted material.

Provenance

Official records of George Bush's presidency are housed at the George Bush Presidential Library and administered by the National Archives and Records Administration (NARA) under the provisions of the Presidential Records Act (PRA).

Processed By

Staff Archivists, 1996–1997. Previously restricted materials are added as they are released.

Scope and Content

The materials in SP (Speeches) are a systematically processed body of documents from the White House Office of Records Management (WHORM) Subject File. This series consists of the SP (speechwriting) category of the White House Office of Records Management (WHORM) Subject File. The series contains reports to Congress sent under Presidential authority and accompanying transmittal letters, as well as drafts, final texts, and cards of speeches and reports delivered by President Bush or prepared by White House staff for publication. Many of the speech drafts are annotated by President Bush and other senior White House staff members. The series also includes speech-related correspondence, memoranda, notes, fact sheets, and press releases. This series does not contain notes or talking points for debates or news

conferences, but it does contain formal statements delivered by the President to the media at the beginning of news conferences.

System of Arrangement

Records that are responsive to this FOIA request were found in Bush Presidential Records: WHORM Subject Files.

The WHORM Subject File compiled by the White House Office of Records Management is comprised of a series of documents assigned a letter/number combination and filed in a subject category. A complete listing of the subject categories including a detailed description of each category is available in our research room and on our website at <http://bushlibrary.tamu.edu/research/find/whorm/whorm.html>. The Speech (SP) category is arranged as follows:

Please note that speech numbers (for example, SP717), preceded by the [C.F.] designation were considered sensitive but are may not be classified. They were generally separated from the bulk of the SP records by the White House staff or the White House Office of Records Management. Thus, when C.F. records are present, they are assigned their own C.F. folder. When no C.F. folder exists for a particular speech, no C.F. documents for that speech exist. All C.F. documents are reviewed for restrictions established by the Freedom of Information Act (FOIA)(5 U.S.C., as amended) and the Presidential Records Act (PRA)(44 U.S.C. 22). In cases where the C.F. records are classified, the Bush Library staff has begun the process of declassification. If you have any questions about the review process, the availability of C.F. documents, or the appeal process, please contact the Bush Library archives.

Also, please note that throughout the Bush administration, the White House Office of Records Management used an optical scanning system for records storage and retrieval. However, due to the volume of the records, not all records were scanned. In this series, scanned records precede unscanned records. Within the scanned records, unscanned attachments are noted with the placement of a marker within the file. Bush Library archivists maintained this filing system for administrative purposes and need to retain the provenance of the records. For the researcher, the scanned / unscanned designation is unimportant except for citation purposes.
